

SANTA FE CHRISTIAN SCHOOLS
EXTENDED STUDIES
SUMMER 2019

SFC SUMMER 2019 EXTENDED STUDIES

REGISTRATION INFORMATION

It's easy to register for extended studies courses online. Simply click at the bottom of any page or go to www.sfcs.net and click on Summer 2019 Extended Studies Enroll Now!

► **Camps, clinics and courses are open to SFC/non-SFC students unless otherwise noted.**

+ **Classes noted with this symbol qualify for graduation credits.**

Payment is due at the time of registration. You may pay by credit card for your convenience. Your child is not considered registered until full payment has been received. Students are registered on a first-come, first-serve basis and many courses fill up quickly.

REQUIRED DOCUMENTS

Your child must have one or more forms on file on the first day of class in order to participate. These forms are available on the registration site.*

ABSENCES/MAKE-UP DAYS

There will be no make-up days, credits or refunds for absences. If a child cannot attend/return to camp due to illness or accident, a doctor's note must accompany the withdrawal request. Refunds due to illness will be pro-rated.

ATTIRE

All students are expected to dress in a manner that honors God, provides for adequate safety on campus, and is respectful and modest in nature. Please refer to the Santa Fe Christian Schools Extended Studies Summer Program Dress Code Expectations online.

CANCELLATION POLICY

Tuition fees will be refunded if a written cancellation request is received according to the refund schedule detailed below. There is a \$25 processing fee for all refunds. Santa Fe Christian Schools reserves the right to cancel any course due to insufficient enrollment. A full refund is provided if the class is canceled. Note: Classes for academic credit are guaranteed to run.

SFC Summer Extended Studies refund amounts:

29+ days prior to class start date:

100% minus \$25 processing fee

15–28 days prior to class start date:

50% minus \$25 processing fee

No refund available 0–14 days prior to class start date.

*By registering for Extended Studies courses, you are giving us permission to use your child's photograph and/or video in future publications.

For more information on Santa Fe Christian's Extended Studies Program, email walker@sfcs.net.

ACADEMICS

College Prep Modern World History

+ FOR CREDIT

Students will study major eras and turning points in modern world history, from the 14th century through the present, including the cause and course of the two world wars in the 20th century. Students will also trace the rise of democratic ideas and understand the historical roots of current world problems and issues. Weeks 1-3 will focus on eras such as the European Renaissance and Reformation, the Age of Exploration, the Atlantic Slave Trade, Age of Absolutism, the Enlightenment, and the American and French Revolutions. Weeks 4-6 will focus on eras such as the Industrial Revolution, the Age of Progress, the Age of Imperialism, Chinese/Japanese relations with West, the Great War, years between wars, World War II, postwar restructuring/Cold War, colonial independence, and global interdependence.

This is an academic class for credit; therefore students may not be absent for more than 8-hours of class time.

Required Text: "Modern World History: Patterns of Interaction," 2012; ISBN: 978-0-547-49114-1 or 0-547-49114-X

College Prep Modern World History, ONLINE

+ FOR CREDIT

This is an ONLINE version of Modern World History. Please keep in mind that the online format will require students to complete work and stay up-to-date on assignments on their own without as much oversight from the course instructor. There will not be any need to come to campus. All the tests, quizzes, and assignments will be on the class page and students will submit essays through their SFCS email account.

Students will study major eras and turning points in modern world history, from the 14th century through the present, including the cause and course of the two world wars in the 20th century. Students will also trace the rise of democratic ideas and understand the historical roots of current world problems and issues. Weeks 1-3 will focus on eras such as the European Renaissance and Reformation, the Age of Exploration, the Atlantic Slave Trade, Age of Absolutism, the Enlightenment, and the American and French Revolutions. ACADEMIC COURSES

Athletic Training/ Sports Medicine Camp

Attention Upper School Students! SFC is offering an engaging, hands-on introduction to the field of sports medicine. If you are a student who is interested in pursuing a career in sports medicine, EMT, paramedics, athletic training, nursing or physical therapy, then this is the course for you. Participants will receive training in assessing injuries, taping, stretching, rehabilitation, injury response and first aid. In addition, participants will assist the Head Athletic Trainer, Kristal Peterson, during the fall season. Those participants who apply to the Athletic Training Program must sign-up for this course to be able to serve as Student Athletic Trainers Aides during the 2019 fall season. This is a fantastic opportunity to not only experience sports medicine first hand, but to gain valuable experience for college and career applications. *Fee includes all supplies.

Kristal Peterson

June 3 - June 6

Monday-Thursday

Math Camp 3/4

Any 3rd-4th grade students who want to develop their math problem-solving skills are welcome to join. Register early, space is limited to 20 students. In this course, students will learn math problem-solving techniques, participate in group problem solving, and compete in mock math contests as a group. This is not a class for tutoring or for homework. The goal of the math camp is to energize students' passion for math while training them to become better math problem-solvers. The cost includes the price of the "Beast Academy Math" textbook.

10:30 AM - 12:00 PM

\$245

SFC Main Campus, Room 511

Incoming 3rd - 4th Grade

Algebra 3

This math camp is probably very different from most math classes you have taken before. I believe, and math education research supports the idea, that the best way to learn mathematics is by solving problems in which at first glance, the solution path is not obvious. It helps students develop what is called "adaptive expertise." Students with adaptive expertise can go beyond the routine competencies, and can be characterized by their flexible, innovative, and creative competencies. A must for any student considering a STEM major.

The purpose of this math camp is to help students become better problem-solvers, develop their adaptive expertise, and learn advanced algebra topics not taught in most high school algebra curriculum. Topics to be learned in the math camp include multivariable polynomials, Vieta's Formulas, Newton Sums, arithmetico-geometric series, and Symmetric Sums. Learning these topics and the problem-solving experience is excellent preparation for doing well on the ACT, SAT, SAT Math Level 2 exam, and the American Mathematics Competition.

Required materials: We will be using the book "Art of Problem Solving: Intermediate Algebra" by Richard Rusczyk. The book and solution manual can be purchased for \$69 at the following AoPS website: <https://artofproblemsolving.com/store/item/intermediate-algebra>

Mike Maxon

ACADEMIC COURSES

Jump Start to 7th Grade Summer Reading

Students will get a jump start on the reading and writing activities seen in 7th grade by completing the biggest part of their summer reading assignment with their classmates and 7th grade English teacher. Through discussion and activities aimed to improve reading speed, vocabulary, and study skills, students will gain a better understanding of “Stand Tall” by Joan Bauer, while also preparing for their first writing assignment of the school year. Students will read and complete all activities related to Joan Bauer’s “Stand Tall” in class – NO PREPARATION & NO HOMEWORK.

Christine Rogers

July 29 - August 2

SFC Main Campus, Room B5

► Incoming 8th Grade **SFC ONLY**

Kindergarten Readiness Camp

Kindergarten Readiness Camp is a wonderful opportunity for students to get a head start in kindergarten. Students will have a chance to spend time in the kindergarten classroom, on the playground, and in other areas of the campus. They will become familiar with kindergarten materials and begin to learn kindergarten skills, such as writing their name “the kindergarten way.” They will also become familiar with class routines and expectations. In addition, this camp experience will help rekindle or create new relationships with friends and the kindergarten teachers. Kindergarten Readiness Camp will help students feel “ready to go” when school starts, as the beginning of school stress will be minimized and will give them an academic, social, and emotional advantage.

Kim Nicodemus & Sandra Kim

July 29 - August 2

Monday - Friday

9:00 AM - 12:00 PM

\$235

SFC Main Campus, Room J1-J2

► Incoming **SFC KINDERGARTEN ONLY**

Math Camp 5/6

Students will learn concepts and problem-solving strategies by engaging in fun, collaborative problem-solving activities. Problems and lessons will be taken from Art of Problem Solving textbooks, the Math Olympiad Creative Problem Solving book, MOEMS M contests, Math Counts Materials and American Mathematics Competitions. To help foster a collaborative environment in which every student feels they are an integral part of the math camp, enrollment will be limited to the first 20 students who register.

Monday - Friday

10:00 AM - 12:00 PM

\$250

SFC Main Campus, Room 523

Incoming 5th - 6th Grade

ACADEMIC COURSES

Algebra Concepts and Problem Solving

Algebra is arguably the most important math topic for students to learn. It is foundational for most math classes that come afterwards, as well as many other STEM classes. **Students will learn concepts and problem-solving strategies by engaging in fun, collaborative problem-solving activities.**

Problems and lessons will be taken from Art of Problem Solving textbooks, as well as curriculum developed at the Center for Research in Math and Science Education that are based on research of how students learn algebra. To help foster a collaborative environment in which every student feels they are an integral part of the math camp, enrollment will be limited to the first 24 students who register. Top high school math problem-solvers from the SFC Math Team will be assisting Mr. Maxon, so that each participant gets individualized feedback every day. This class is ideal for students taking Algebra 1 next year, or who have completed Algebra 1 recently and want to get even better at it before enrolling in Algebra 2.

Mike Maxon

July 29 - August 7

Monday - Friday & Monday - Wednesday

10:00 AM - 12:30 PM

\$330

SFC Main Campus, Room 522

Incoming 5th - 9th Grade

SAT Preparation Course

This SAT preparation course is everything you need to score well on the SAT exam in August. This 8-day, 3-hour per day, comprehensive SAT preparation course will teach students the strategies and content needed to maximize their score on SAT test day. Taught by SAT experts, this engaging course will include all curriculum for students to do additional practice between classes, and once the class is completed.

There's No Business Like Show Business: MADAGASCAR!

Come join us for another fantastic summer opportunity at Santa Fe Christian Schools. Campers will learn the basics of musical theater, including singing, acting, dancing, costumes, makeup, and props. Build confidence if you're a beginner, or sharpen your vocal and acting technique as a lead character if you're ready for the next step.

Auditions will be held on Monday, so come prepared with a 1:00 minute audition piece if you'd like to audition for a role. A camp production will be put on at the end of the week – open to friends, family, and the public.

World Peace Challenge

What is it about world peace? Everybody wants it, but no one can achieve it. Why have people been working towards this since the beginning of time and have yet to be successful? Well, we're wondering... do YOU have what it takes? Calling all leaders with critical thinking, communication and collaboration skills to solve the world's biggest riddle within a complex and interactive game format, unlike anything you've seen before. Students will be placed into competitive teams, given astute leadership roles, and a plethora of opportunities to be creative as they play an adapted version of the world famous "World Peace Game" by John Hunter. Time's running out... are you up for the challenge? Cost includes all materials and supplies, including a snack.
